

JANUARY to APRIL 2008 SEMINARS

You are invited to attend special training seminars at York. Please review the schedule and topics below to determine which seminar is right for you. If you have any questions about who should attend and how to register, please call us at 1-800-344-8842.

- Wednesday, January 16: **Basics of Electrical Motors – Induction AC Motors & DC Motors:** AC and DC motor electrical operation, mechanical construction, efficiency and power factor

- Wednesday, February 13: **Large Motor Basics:** large motor mechanical construction, electrical design of medium voltage motors, insulation systems, lubrication and bearings, enclosures (cooling considerations)

- Wednesday, March 12: **Basics of Servo Motors:** overview of AC Servo motors, difference between servo and induction motors, overview of different feedback types and common servo failure modes

- Wednesday, April 16: **Basics of Motor Repair and Maintenance, In-Field Service:** Basic predictive maintenance, repair vs. replace considerations, failure modes, York motor repair capabilities

All seminars begin at 10:00 a.m. and average 2.5 hours. Each seminar is concluded by a 30 minute tour of York.

Who Should Attend:

The seminars are great for maintenance manager, plant managers, engineers, purchasing managers and skill trades who want to learn more about these interesting topics.

How to Register:

Please call York at 1-800-344-8842 to register for each of the seminars or complete the form on the back and fax to York at (989) 684-7465. The cost is \$95.00 per person. Fees may be waived by the York management team's discretion. Registration is limited to the first 25 respondents. Cut off date for registration is the Friday before the seminar date.
