

## MAY & JUNE 2010 SEMINARS

You are invited to attend special training seminars at York. Please review the schedule and topics below to determine which seminar is right for you. If you have any questions about who should attend and how to register, please call us at 1-800-344-8842.

- Wednesday, May 12:                   **Large Motor Basics:** large motor mechanical construction, electrical design of medium voltage motors, insulation systems, lubrication and bearings, enclosures (cooling considerations)
  
- Wednesday, June 16:               **Basics of Motor Repair and Maintenance, In-Field Service:** Basic predictive maintenance, repair vs. replace considerations, failure modes, York motor repair capabilities

All seminars begin at 10:00 a.m. and average 2.5 hours. Each seminar is concluded by a 30 minute tour of York.

### Who Should Attend:

The seminars are great for maintenance managers, plant managers, engineers, purchasing managers and skilled trades who want to learn more about these interesting topics.

### How to Register:

Please call York at 1-800-344-8842 to register for each of the seminars or complete the form and fax to York at (989) 684-7465. Registration is limited to the first 20 respondents. Cut off date for registration is the Friday before the seminar date.

### Registration:

I would like to attend the following seminar(s):

- May 12, 2010:                   Large Motor Basics
- June 16, 2010:               Basics of Motor Repair and Maintenance, In-Field Service
