

2012 Seminars

You are invited to attend special training seminars at York. Please review the schedule and topics below to determine which seminar is right for you. If you have any questions about who should attend and how to register, please call us at 1-800-344-8842.

- Tuesday, February 21st: **Basics of Electrical Motors – Induction AC Motors & DC Motors:** AC and DC motor electrical operation, mechanical construction, efficiency and power factor
- Tuesday, March 20th: **Large Motor Basics:** large motor mechanical construction, electrical design of medium voltage motors, insulation systems, lubrication and bearings, enclosures (cooling considerations)
- Tuesday, April 17th: **Basics of Motor Repair and Maintenance, In-Field Service:** Basic predictive maintenance, repair vs. replace considerations, failure modes, York motor repair capabilities
- Tuesday, May 15th: **Basics of Servo Motors:** overview of AC Servo motors, difference between servo and induction motors, overview of different feedback types and common servo failure modes

All seminars begin at 10:00 a.m. ending approximately 2 p.m. Each seminar is concluded by a 30 minute tour of York.

Who Should Attend:

The seminars are great for maintenance managers, plant managers, engineers, purchasing managers and skilled trades who want to learn more about these interesting topics.

How to Register:

Please complete the form and fax to York at (989) 684-7465 or email to nchartier@yorkrepair.com. Registration is limited to the first 20 respondents. Cut off date for registration is the Friday before the seminar date.
