

ASSET MANAGEMENT

In today's business world, asset management is an advantage. Industrial needs fluctuate day to day and repairs require timely solutions in order to minimize downtime. York is a company that not only is innovative, but also has integrity and dedication. York's Asset Management Division manages your assets with exceptional quality and service providing you more time to manage your core business. You can place your trust in York when your company demands a rapid repair solution. York is ***The Power Behind Your Productivity™***.

York has over 20 years of Motor Management and has evolved our tagging and tracking system of over 21,000 motors into an all-inclusive Repairable Asset Management Program. Since 2001, our computer system has been customized to track repairs from pick up to return. Our bar coding system is capable of tracking warranty work from the date the unit is put into service, not the date it is put on the shelf. Item level pictures, open and closed work orders, along with repair report documents are included as part of our web based software solution. Call your sales representative to discuss what your needs are and how York can help your business.

WARRANTY AND REPAIR HIGHLIGHTS

York processes over 20,000 SKUs annually with a documented customer cost savings of \$2,750,000 in 2007. We have warranty and repair management contracts with seven major automotive plants and established purchasing relationships with over 300 manufacturers. Our 76-member full time staff has eight employees dedicated to the Asset Management department and two computer programmers on-site to support custom reporting needs. Clients can also schedule daily pick up and delivery and utilize our customized online system for instant access to in process repair status reporting.

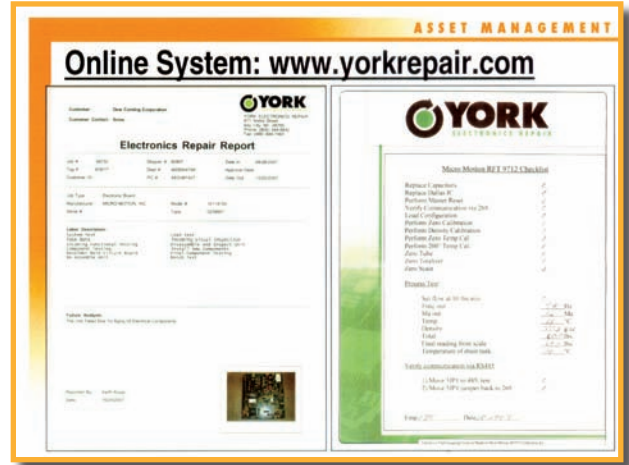

For more information, visit our web site at www.yorkrepair.com.

ONLINE TRACKING SYSTEM

York strives to process items within 24 hours of receipt and commence repair or send them to an authorized repair facility. All items are given a unique asset number for lifetime warranty tracking and automatically flagged upon receipt.

Information regarding the status of warranty and repair work, pricing and anticipated delivery dates is available on a daily basis via online access or automated email reporting. We also analyze each item against inventory balance to improve cost savings from inventory reduction. Vendor performance is tracked as well, including warranty tracking, cost, repair cycle time and quality.

In addition, we return items to the customer the next working day after receipt at York, or sooner if required. Billing is by summary or individual invoice and we prefer to have a Blanket PO set up to ease administrative work. Please contact your sales representative to find out how we can help your company.
